

Project Documentation — Day 1

Project Name: Contract AI

Overview:

Contract AI is an AI-powered system to analyze and generate contracts.

Day 1 focus = project setup (frontend + backend + MySQL connection).

Architecture:

React (Frontend) → Node.js + Express (Backend) → MySQL (Database)

APIs Implemented:

POST /signup — register user

POST /login — validate user

Database Tables:

users (id INT PK, username VARCHAR, password VARCHAR)

Local Run Steps:

1. cd backend → npm install → node index.js
2. cd frontend → npm install → npm start
